

Instruction Manual

Foot Brake Replacement

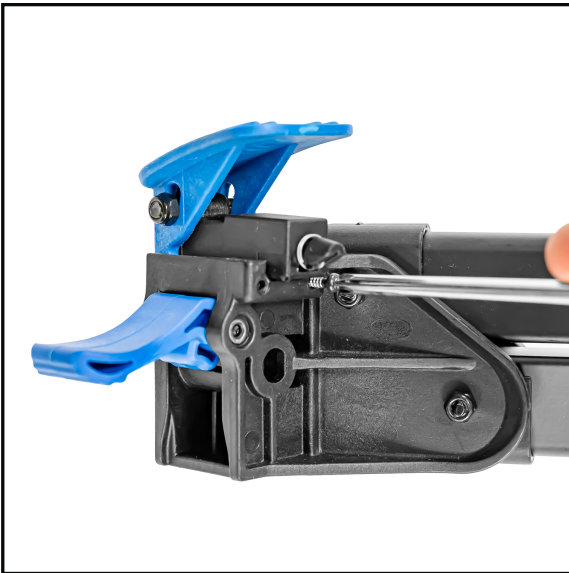

1

Prepare the Trolley

Release the left wheel lever and remove the wheel. This provides clear access to the brake mechanism.

2

Remove the Old Brake

Using a screwdriver, remove the two 10mm screws located beneath the brake lever. Keep these screws in a safe place for reassembly.

3

Clean the Frame

Slide the old brake assembly off the frame. Thoroughly wipe down the trolley frame to remove any dirt or debris before installing the new part.

4

Install the New Part

Slide the replacement foot brake into position on the frame.

5

Secure and Test

Reinsert the screws and tighten them fully. Reattach the wheel and test the brake to ensure it functions correctly before heading to the course.
